ENGLISH

The Cost of Manual WhatsApp Customer Service

Businesses lose high-intent clients every day due to operational bottlenecks on chat channels.

Slow Response Times

78% of customers buy from the company that replies first.

Delayed responses at night or during rush hours result in immediate drop-offs.

Average response delay: 28+ minutes

Repetitive Workload

Staff spend over 65% of their working hours answering the exact same questions: opening hours, menu prices, delivery fees, and branch addresses.

40+ hours wasted per employee / month

Zero Analytics & Lost Data

Standard WhatsApp Business lacks unified customer CRM, sales tracking, rush-hour volume heatmaps, and structured order pipelines.

Untracked revenue & lost customer history

The Complete Autonomous Business Operating System

ClientBot bridges WhatsApp with powerful backend automation and team orchestration.

Meta Cloud API

Official enterprise integration. Zero risk of account bans. High-speed webhook listeners handle high concurrent messages seamlessly.

Official Gateway

Bilingual AI Brain

Advanced language engine trained on your business profile, products, policies, and dialect nuances (Egyptian Arabic, Franco, MSA, English).

Semantic NLP

Live Team Takeover

Shared team inbox. Human staff can pause the bot and step in with 1-click whenever high-touch VIP assistance or complex handling is needed.

Unified Inbox

Command Center

Full visual SPA dashboard. Tracks orders, booking calendars, revenue, response latencies, peak hours, and customer retention metrics.

Real-time Analytics

 In-Chat Orders & Checkout

Turn Conversations Directly into Completed Sales

Clients do not want to download another app or fill out clumsy website forms. ClientBot lets them order meals, specialty drinks, retail products, or services directly inside WhatsApp with zero friction.

- ✔ **Smart Menu & Catalog:** Displays real-time prices, stock status, and item descriptions.
- ✔ **Automatic Cart Calculation:** Computes subtotals, delivery fees, and order totals.
- ✔ **Address & Note Capture:** Validates delivery address and custom preparation requests.
- ✔ **Sequential Tracking:** Generates unique order numbers (ORD-0001) with status lifecycle.

WhatsApp Live Order Flow

ORD-0001

Client (201012345678):

"عايز اطلب 2 فلات وايت و 1 كرواسون لوز على ميدان التحرير"

ClientBot AI:

تمام يا فندم! سجلت لحضرتك:

- 2x Flat white (130 EGP)
- 1x Almond Croissant (55 EGP)

شامل التوصيل EGP الإجمالي: 210

"إجاري التجهيز فوراً. Tahrir Square العنوان: 15"

 Table Reservations & Scheduling

Hands-Free Booking Management for Hospitality & Clinics

Stop taking reservations on sticky notes or missing client booking requests during evening shifts. ClientBot coordinates dates, party sizes, and seat preferences automatically.

Party Size Confirmation

Extracts exact guest counts and applies reservation policies automatically.

Date & Time Parsing

Understands relative dates: "Tomorrow at 7:30 PM", "الجمعة الساعة 8".

Instant Confirmations

Sends immediate confirmation templates with branch location pin.

Reservation Status Life

Staff can mark bookings as Confirmed, Completed, or Cancelled in 1 click.

Fluent Arabic & English AI That Continuously Learns

Unlike rigid rule-based bots with limited button menus, ClientBot uses contextual natural language processing to understand real human speech.

Bilingual & Dialect Fluent

Automatically replies in the client's language: Egyptian Arabic, Franco-Arab, Standard Arabic, or English. Mirrors customer tone respectfully.

1-Click Auto-Learning

Unanswered questions are tracked automatically. A single tap in the dashboard converts any repeated client inquiry into a saved, verified FAQ answer.

Company Knowledge Base

Equipped with refund policies, delivery radius rules, payment options (Cash, Visa, InstaPay), and Wi-Fi credentials for instant accuracy.

 Shared Team Live Chat & Takeover

The Best of Both Worlds: AI Speed + Human Empathy

AI handles 90%+ of repetitive inquiries, but when a client requests a manager or needs special handling, your staff takes over seamlessly with zero bot disruption.

- ✔ **1-Click Takeover Toggle:** Instantly pauses AI replies for a configurable duration (e.g. 60 min).
- ✔ **Smart Handoff Escalation Tickets:** Automatically logs client sentiment and reason for escalation.
- ✔ **Canned Message Templates:** Insert welcome notes, location pins, and closing hours with 1 tap.
- ✔ **Multi-Agent Visibility:** All team members view real-time chat history without sharing personal phones.

Two-Way Team Live Inbox Human Takeover Active

Omar Sherif (+201255556666)
"Can I speak with a store manager please?"

Release to
AI

AI Copilot Recommendation:
"Client requested manager assistance regarding rooftop reservation. Suggested reply: Hello Omar! This is the store manager, how can I assist you with your booking?"

 360° Unified Customer Intelligence

Know Every Customer Before You Even Reply

ClientBot automatically constructs a rich behavioral profile for every customer phone number, linking chat dialogues, order spend, booking records, and language preference.

VIP & Regular Client Badges

Automatically identifies high-value clients with 3+ orders or 250+ EGP lifetime spend.

Sentiment & Issue Tracking

Detects recurring complaints (e.g. delivery delays, wrong items) and alerts staff.

Language Memory

Remembers whether client prefers Egyptian Arabic or English for future chats.

Executive AI Summary

Generates a concise 2-sentence dossier to give staff instant context.

24-Hour Peak Activity Distribution Chart

Identifies exact evening dinner or morning coffee rush hours (e.g. 6 PM – 9 PM) so managers can optimize kitchen, barista, and delivery staffing.

One-Click Executive Reports

Export structured CSV data for Excel or print formatted PDF executive reports for stakeholder audits.

Team Role Security & Broadcast Marketing Campaigns

Scale your business operations while protecting sensitive company settings.

Role-Based Access Control (RBAC)

Invite team members with clear permission tiers:

- Admin** Full access, config, team management, API keys
- Editor** Live chat, edit FAQs, manage orders & reservations
- Viewer** Read-only auditing, view metrics & export reports

Broadcast Marketing & Re-Engagement

Send targeted announcement campaigns to re-activate past buyers:

- Audience Segmentation**
Filter by tags: All Clients, VIP Regulars, Reservation Guests, or Inactive Leads.
- Promotions & Tasting Events**
Announce seasonal menu launches, weekend discounts, and special invitations.

Quantifiable ROI from Day One

How ClientBot translates into tangible cost savings and revenue growth.

35%+

Increase in After-Hours Sales

Converts late-night and early-morning orders when competitors are closed.

70%

Labor Time Saved

Frees up front-desk and support staff from answering repetitive questions.

98%

Client Satisfaction

Instant, polite answers in natural language build immediate trust.

0 min

Downtime or Delays

Continuous uptime without coffee breaks, shift changes, or holidays.

Deploy in Under 15 Minutes

No complex coding or hardware needed. Connect your official Meta Cloud API and start taking automated orders today.

STEP 01

Connect Meta WhatsApp

Input your Phone Number ID and Access Token. Official webhook connects instantly.

STEP 02

Add Products & FAQs

Upload your menu items, opening hours, delivery fees, and locations.

STEP 03

Go Live 24/7

Your AI bot handles customer chats while staff monitor the shared dashboard.

Ready to see ClientBot in action for your business?

Test live orders, interactive bookings, and chat simulations right now.
